

ixi-UMS Enterprise for SAP systems

ixi-UMS Enterprise Connector for use with SAP® R/3® - Unified Messaging (fax, voice, SMS for SAP R3, SAP ERP, SAPoffice, SAP CRM, SAP Business Suite)

- Connector for SAPconnect/BC-CON
- Multiple clients
- Monitoring the connector directly from SAP (connection test, condition, trace)
- Connector combination with other systems such as Microsoft Exchange Server or IBM Domino
- ixi-UMS Enterprise Connector concepts and message distribution server for complex multi-site architectures and distributed servers (e.g. centralized SAP system, distributed messaging servers)
- All messages clearly arranged and integrated under a single interface
- Send and receive fax
- SMS (send and receive short messages)
- Default sender, fax cover sheet and layout adjustable per instance
- Dispatch confirmations to the SAP system, even if the confirmations are delivered to another mail system.
- Optionally via additional messaging system
 - Voice mailbox (answering machine functionality)
 - Mobile access and control via mobile phone/telephone

System Requirements

- ixi-UMS Enterprise Connector for use with SAP® R/3®
- SAP systems with SAPconnect (R/3 from 3.1G)
