

Maximum benefits! Minimum outlay. The future-focused communication application **ProCall go** offers secure, real-time communication for more productive employees and better collaboration thanks to tools such as video communication, presence management and instant messaging.

ProCall go

Modern Video Communication

Enrich your Workstation with Modern Video Communication.

ProCall go is based on the UC best-seller ProCall Enterprise and offers the trusted estos quality for anyone working without a classic telephone system and communicating mainly via their mobile phone. Determine the availability of your contact at a glance and collaborate regardless of your location using the methods you prefer successfully and efficiently! All this is based on the open Internet standard WebRTC.

The key features at a glance:

- Video communication, intelligent presence management and IM, including outside the company with federation (SIP Simple / XMPP).
- Native apps (iOS & Android) for secure communication via the Internet for employees in the field or on business trips.
- Efficient on the move too: through computer smartphone integration. Integrate mobile phones seamlessly into the CTI world with Bluetooth and profit from familiar comfort features such as dialing assistants and contact data integration on the PC workstation.
