CAP

The alignment of the "crown" on the profile picture explains the color of the presence ring for people with a handicap and therefore the presence state

4 Directions = 4 Colors

Clockwise

Rotating to the right symbolizes the future and openness to innovation

Large image

Profile picture surrounded by a presence ring with CAP

Medium image

Easy sharing of content

Share files, photos and videos with ProCall for Windows, iOS and Android

- Transmission via the existing server interface
 - No additional configuration necessary
 - Maximum configurable file size (max. 25 MB)
 - Optional: Transmission encryption (TLS) possible
- Central storage location for content
 - File location configurable in the UCServer Administrator
 - Maximum amount of mass storage available can be limited (quota)
 - Content stored as unreadable
 - Optional: Automatic cleanup of stored content
- Blacklist for file types
 - Default setting (see Outlook)
 - Freely configurable

Text chat with file sharing, replying, forwarding

VideoChat chat window

Simplified adaptation for business process integration

- Configuration via user-defined actions
 - Parameterizable call-up of third-party applications
 - Access to dynamic (e.g. active call) or static (e.g. MetaDirectory) data
 - Individual or administrative configuration

- Menu or call window integration in ProCall for Windows
 - Context menu can be extended with contact specific actions
 - External applications can be started via the main menu
 - Individual buttons with their own icons can be integrated in the call window

User-defined action [X]

Select a name for the custom action and enter the parameters required by the third-party application

Name of action:

Application: ...

Command line: Add field ▾

Directory: ...

Mode: ▾

Description: Change Icon...

User-defined actions

You can add applications as user-defined actions here.

Administrative configuration

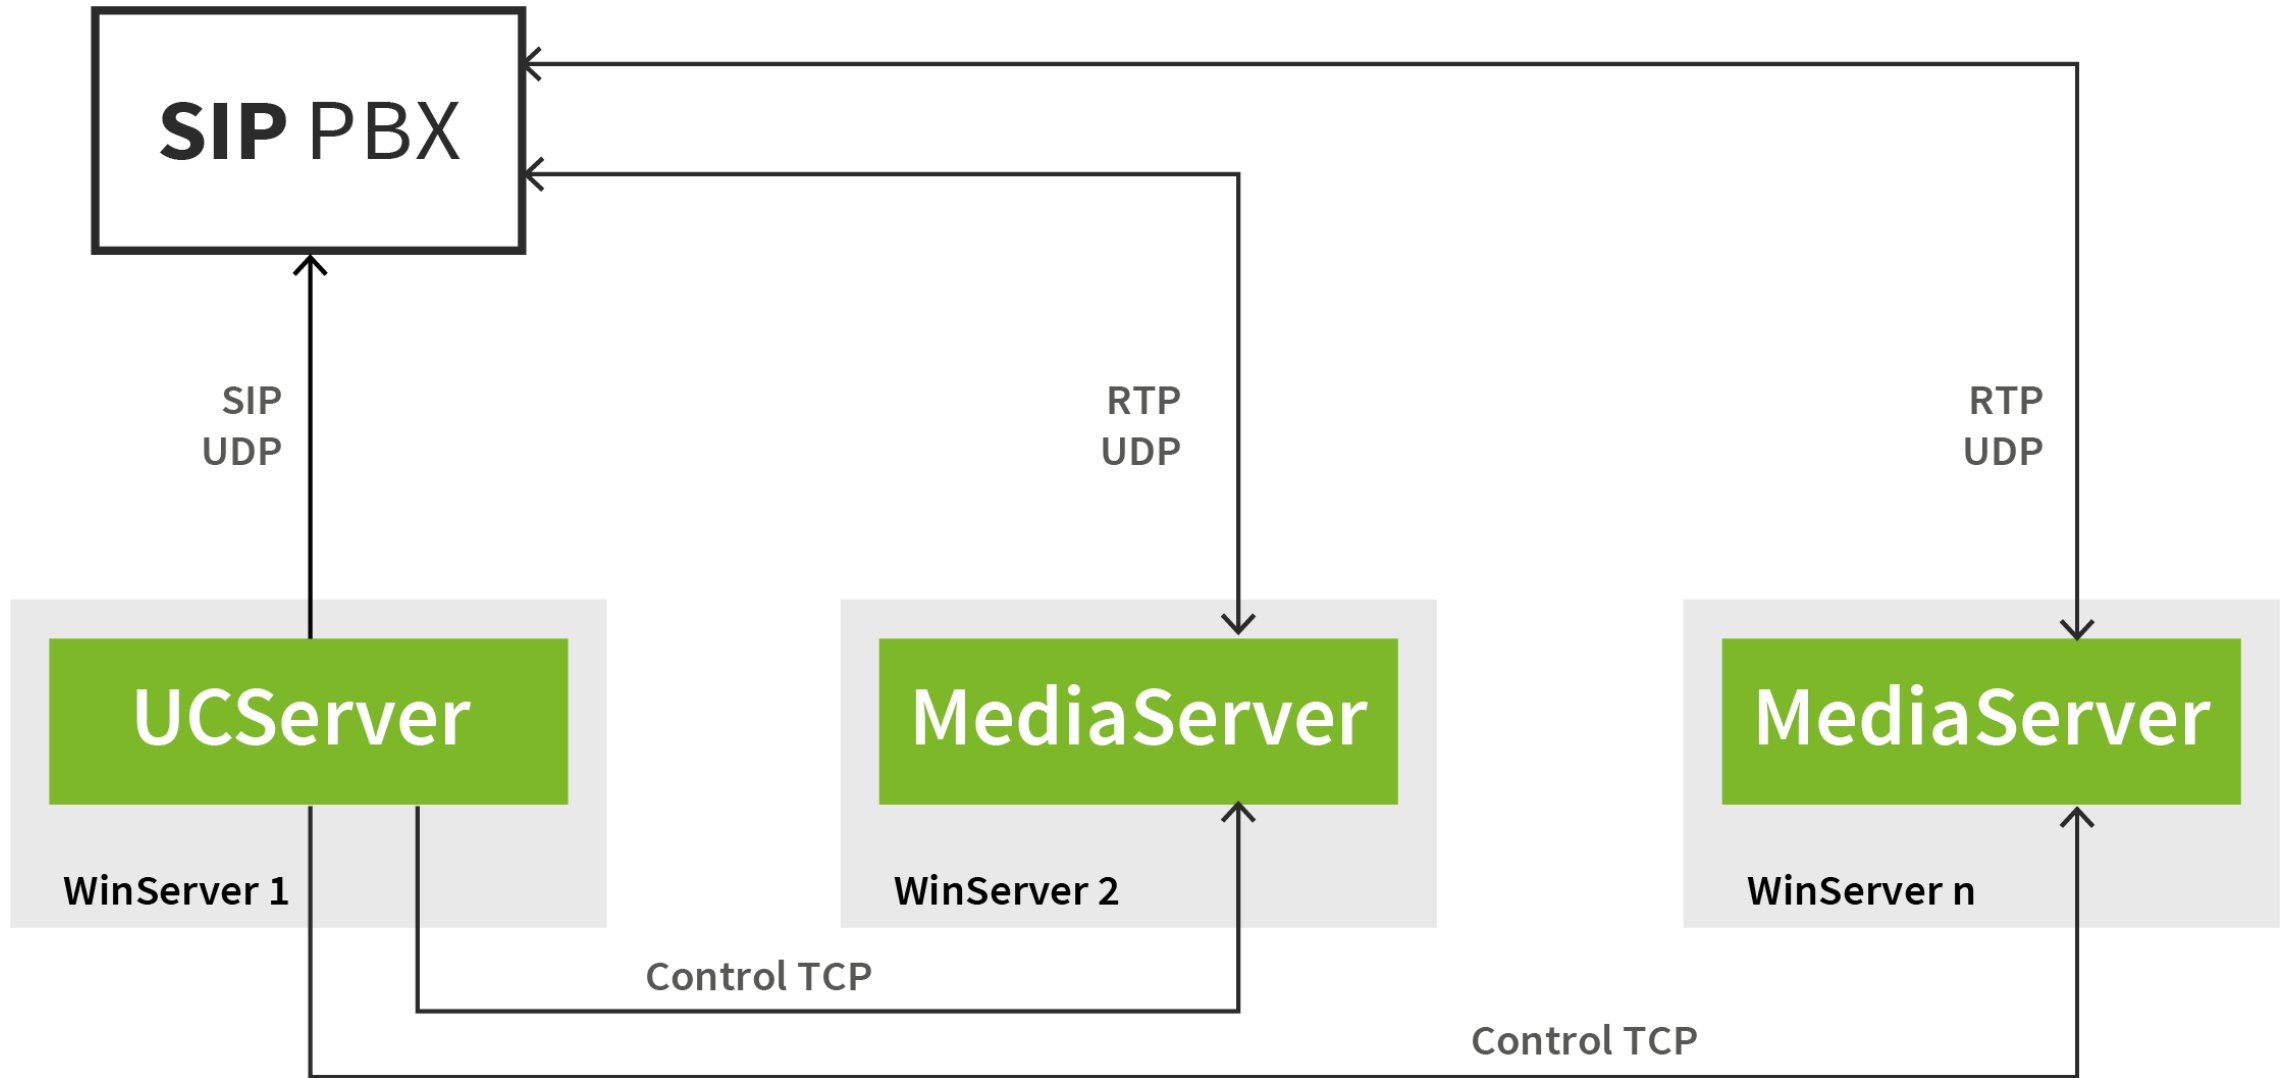

- Favorite contacts, monitor contents and keys
 - Configuration with UCServer Administrator
 - Assignment via UCServer groups
 - Complex configuration via manual customization of XML files is no longer necessary
- Actions
 - Can be activated on the client via UCServer profiles or ADM templates
 - XML file must be provided via a central location
 - Previously administrative distribution only possible via group policies

Large softphone environments

- Modifications to the UCServer and UCMediaServer
 - Operation of the UCMediaServer in own runtime environment
 - Operation of the UCServer with multiple UCMediaServers
- Automatic load distribution (round-robin) of softphone calls
- Automatic failover on any MediaServer failure
- Improved analysis options regarding the utilization of the entire system
- Configuration according to the Best Practice Manual

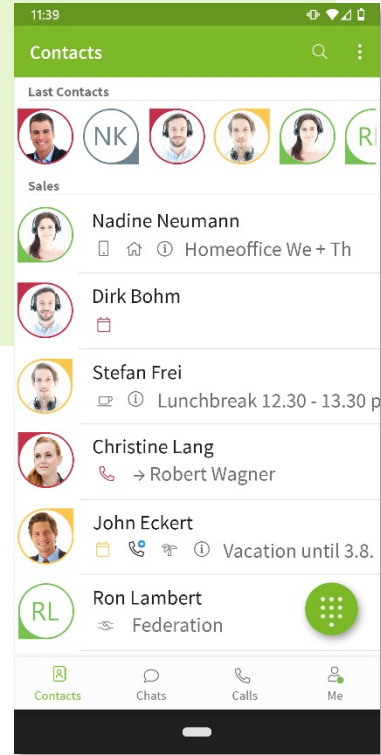

**What has been improved
in ProCall 7 Enterprise?**
