estos
enables easy communication

The **ixi-UMS Business** unified messaging software is an all-in-one solution integrating fax, voice and SMS services into system environments such as Microsoft Exchange or IBM Domino and also offers mobile access to all messages.

Enterprises benefit from easy-to-install software which is simple to administer and which offers exceptionally intuitive operation. This means that the software can be used efficiently right from the start.
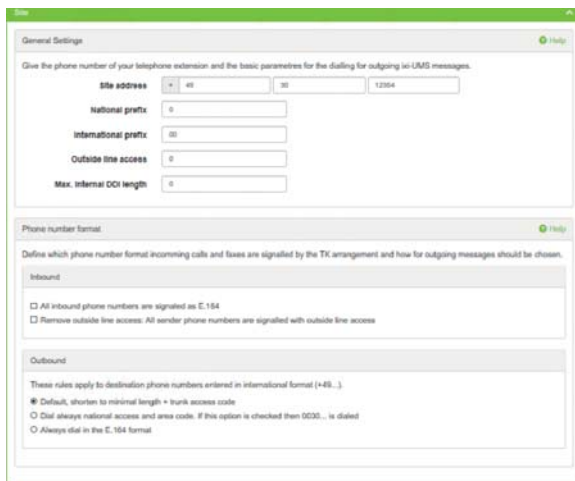

ixi-UMS Business

Unified messaging software in a simple, all-in-one package

estos.com

Straightforward Operation. Reliable Communication.

The future-ready ixi-UMS 6 Business unified messaging server is available in two package versions and differs only in terms of the connection to the telephone system:

- ixi-UMS Business SIP with integrated XCAPI
  (connection to SIP or H.323)
- ixi-UMS Business TDM for direct CAPI connection

Integration into existing IT architectures

The ixi-UMS 6 Business SMTP Connector facilitates connectivity to various messaging systems:

- Microsoft Exchange Server
- IBM Domino
- Open-Xchange
- All other SMTP-based messaging systems

Simple operation via web configuration

New and unique in this area is the administration of the ixi-UMS Business system via a web browser of your choice. This saves time and makes setup easier.
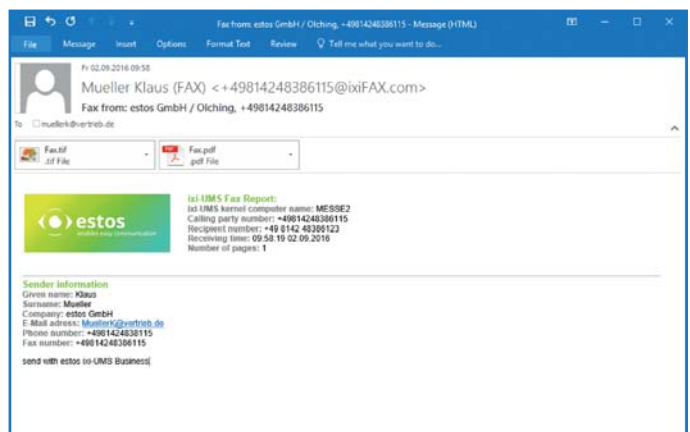

All messages at a glance

Management of all messages via a standardized interface directly on the workstation or on a mobile device via the e-mail client or a website in the user's browser.

→ Integration into ProCall Enterprise

By integrating **ixi-UMS Business** into estos ProCall Enterprise, ixi-UMS Business and ProCall Enterprise are transformed into a CTI, unified messaging, unified communications and collaboration software suite that is easy to install and which offers an extensive array of services.
